SunTegra® Receives 2017 HOBI Award for Best Exterior Green Feature with Murphy Brothers Contracting

Port Chester, NY — SunTegra, a leading provider of integrated solar roof systems, has received the 2017 HOBI Award for Best Exterior Green Feature with Murphy Brothers Contracting for the SunTegra solar shingle roof installation at 7 Kenilworth Dr. East, Stamford, Connecticut.

Organized by the Home Builders & Remodelers Association of Connecticut, the prestigious HOBI or Home Building Industry Awards annually showcases the best products and services offered by the organization's members across categories such as new home construction, remodeling, sales and marketing and technology. Over 800 industry professionals attended the 24th annual HOBI awards ceremony held on November 15 at the Aqua Turf Club in Southington.

Earlier this year, SunTegra partnered with Murphy Brothers Contracting, a high-end custom home builder serving Westchester and Connecticut, to install the awarded SunTegra solar shingle roof project, which at the time became the first-ever solar roof installed in Stamford.

"We were very pleased when we received the call from Michael Murphy about the HOBI Award victory," said Mark Paille, VP of Sales and Marketing at SunTegra. "The event was a terrific opportunity to introduce SunTegra's solar shingle roof to HOBI's network of talented and respected Connecticut homebuilding professionals."

The SunTegra solar shingles attach directly to the roof and integrate with the surrounding asphalt shingle roofing through an intermediary flashing. The solar roof system functions as both a solar panel and a roofing material.

About SunTegra

Founded by Oliver Koehler in 2013, SunTegra (formerly known as Integrated Solar Technology, LLC.) is a building-integrated solar products company offering homeowners and businesses aesthetically-pleasing, financially-viable alternatives to standard, rack-mounted solar panels. The SunTegra Solar Shingle and Solar Tile Roofs integrate into the way we live and build. By installing flush to the roof decking with no racking system needed and in place of traditional roofing materials, SunTegra systems are low-profile and provide protection for the home. By leveraging the most proven solar energy technologies, SunTegra Solar Roofs are as efficient as standard solar panels and provide homeowners with the long-term energy bill savings that make solar a sound investment. SunTegra offers its Shingles and Tiles to homeowners and businesses through its Authorized Dealer Network consisting of roofers, builders, and solar contractors. The SunTegra Solar Shingles and Tiles are UL certified. For more information, see www.suntegrasolar.com.

About Murphy Brothers Contracting

Murphy Brothers Contracting Inc. is owned and operated by brothers and partners, Chris and Sean Murphy. Celebrating their 38th year in the construction business, Murphy Brothers Contracting is known throughout the Westchester, Hudson Valley, southern Fairfield region for building and renovating beautifully designed custom homes as well as private clubs and equestrian estates, offering their clients the highest level of quality and professionalism in the industry. The company is currently completing the restoration, rebuild and renovation of the historic Ardsley Country Club, located in Dobbs Ferry, NY.
